Roofing Tile

Supplies the necessary color

CALIFORNIA architecture requires color . . . warm colors that will complement the cool greens of the grass and shrubbery . . . and the clear blue of the sunlit sky.

Burned clay roof tile supplies this need. It is moulded from the colorful clays of California. It turns each roof into a galaxy of deep, subdued tints. It displays itself vividly against its natural surrounding, yet it is never obtrusive, is always pleasing to the eye.

Our building experts are always ready to explain more about burned clay roof tile. Before you build call on us.

Two examples of **Stone-Tile** residence construction —indicating in a very small degree the **adaptability** of Stone-Tile to any design or any size—in either residences or commercial buildings. . . .

Stone-Tile walls provide maximum **protection** against heat and cold and dampness. **Strength and Durability** to carry heavy loads and side stress.

Permanence, a guard against early depreciation; and, finally, the much desired **Fire Safety**.

Stone-Tile construction is also actually **Economical**.
